MASTER BLUEPRINT: THE MGG DRAGON CHIP GLASSES & SKY MAPPING ECOSYSTEM (FAMILY V1.5)

Document Reference: MGG-DC-SMS-2026-FINAL-V1.5

Proprietor: Martin Savale | Meta Guinea Ghost Ltd

Date: March 9, 2026

Status: 10/10 GREEN LIGHT (FAMILY INTEGRATION VERSION) Security Status: Sovereign Asset - Vertical Integration Only

1. THE MGG PRODUCT FAMILY (The Core Engine)

The **Dragon Chip Glasses** are the visual interface, powered by a unified loop of proprietary technology:

- **Hawk AI (The Scout):** The primary spatial-intelligence engine. It performs real-time environmental scanning to build the **Infrastructure Grid** (3D data nodes) for landmarks, signage, and hazards.
- **The Pulse Button (The Command):** A wearable, minimal tactile interface for **hands-free node locking**. Allows the user to select and "lock" a target from the Hawk AI grid via haptic feedback, triggering the optical zoom without screen contact.
- **Dragon Chip (The Processor):** The core "Black Box" internal module managing 3D rendering, **Thermal Node Tracking**, and proprietary encryption for the visual stream.

- **Ghost AMP (The Pipeline):** The high-bandwidth, encrypted data conduit enabling **Zero-Latency** global synchronization (e.g., Brighton to Sydney).
- **Birds-I-view (The Interface):** The overarching command center for iPhone, Android, and Desktop. It hosts the Sky Mapping interface and the journey archive.

2. INDUSTRIAL-PREMIUM HARDWARE SPECIFICATIONS

- **Liquid Lens Optical Extension:** Physical **1x to 10x optical zoom**. Utilizing variable-focus liquid technology, the lens physically snaps into focus based on Sky Mapping coordinates. No digital artifacts.
- **Medical Lens Anchor (The Specsavers Model):** Full modular accommodation for **Myopia, Hyperopia, and Astigmatism**. The Dragon Chip augments natural vision through a prescription-integrated optical path.
- **IP69K Hurricane Resilience:** Vacuum-sealed against **1450 PSI** water jets. Features a permanent **hydrophobic molecular coating** to ensure zero-blur visibility in torrential rain or 100% humidity.
- **Graphene-State Power:** High-density Graphene battery cells with **5-minute ultra-fast charging**. 100% operational in extreme sub-zero or high-heat environments where Lithium-ion fails.

3. THE INTELLIGENCE LAYER: SAFETY & NAVIGATION

- **Hurricane-Mode HUD (Ghost Paint):** In zero-visibility conditions (fog, storms, smoke), the HUD renders the stored **Hawk AI Infrastructure Grid** as a 3D wireframe overlay, allowing 100% navigational success.

- **Thermal Node Tracking:** Integrated heat signature identification. Highlights living entities (people, pets, hazards) within the HUD during emergency rescue or low-visibility scenarios.

4. THE SISTER-SYNC NARRATIVE (Video Roadmap)

- **Humanity:** Karmen (Brighton, UK) calls Serena (Sydney, AU). No tech is visible.
- **Awakening:** Karmen activates the **Hawk AI Scout**; the **Sky Mapping Grid** washes over Brighton.
- **The Snap:** Karmen uses the **Pulse Button** to lock a sign 500m away. The **Dragon Chip** triggers the **Liquid Lens** to snap to clarity for both sisters via the **Ghost AMP Pipeline**.
- **Resilience:** Hurricane conditions hit. **Hurricane-Mode** activates. The **3D Ghost Paint** and **Thermal Tracking** guide her home safely.
- **The Truth:** Title Card — "*This is not science fiction. Every product you just saw exists within the Meta Guinea Ghost ecosystem.*"

5. THE SOVEREIGNTY & PURITY CLAUSE

- **Non-Negotiable:** All franchise and third-party licensing models are **permanently cancelled**.
- **Vertical Integration:** 100% internal manufacturing of all **MGG Family Products** to ensure the "Honest Purity" of the brand.
- **Benefit Priority:** This technology is built for the **Benefit of the People** and the safety of the global digital family.
